JokerDuty — Discord Intent Evidence

Exhibit 1: Command reference

The JokerDuty bot lists text-based commands such as !on, !off, !online, and staff administration commands. This supports the explanation of how text commands are used; it does not by itself demonstrate that privileged Message Content access is essential.

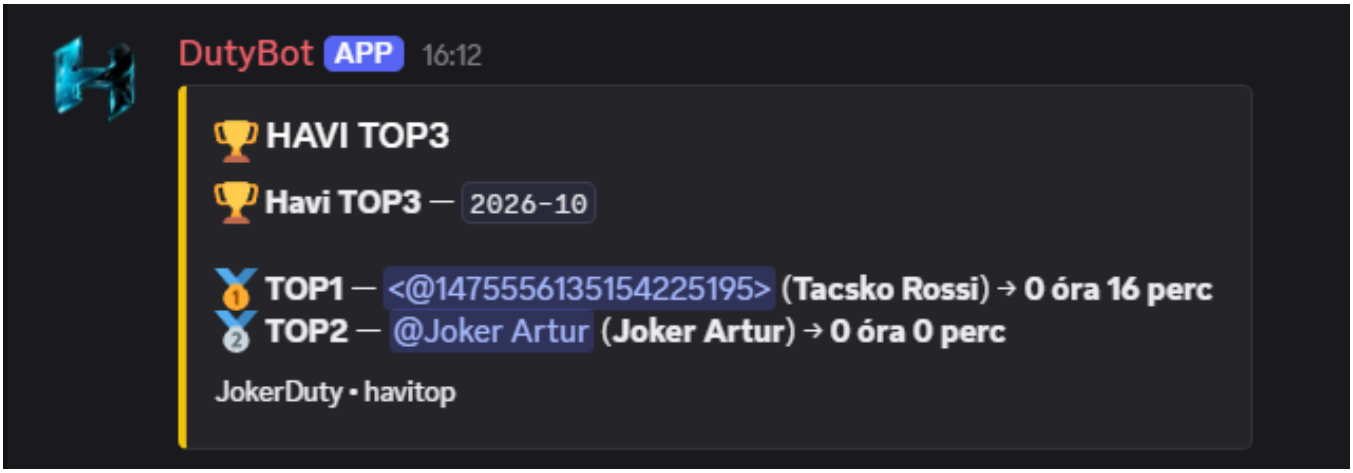

Evidence note: Screenshots are supplied by the bot operator and show actual Discord messages. They demonstrate user-facing features but may not alone establish the technical need for Server Members Intent. Additional technical explanation or a member-event demonstration may be requested.

JokerDuty — Discord Intent Evidence

Exhibit 2: Monthly duty leaderboard

A real bot response shows a monthly top-three duty ranking and associates duty totals with Discord members.

Evidence note: Screenshots are supplied by the bot operator and show actual Discord messages. They demonstrate user-facing features but may not alone establish the technical need for Server Members Intent. Additional technical explanation or a member-event demonstration may be requested.

JokerDuty — Discord Intent Evidence

Exhibit 3: Weekly duty leaderboard

A real bot response displays weekly duty totals for multiple staff members.

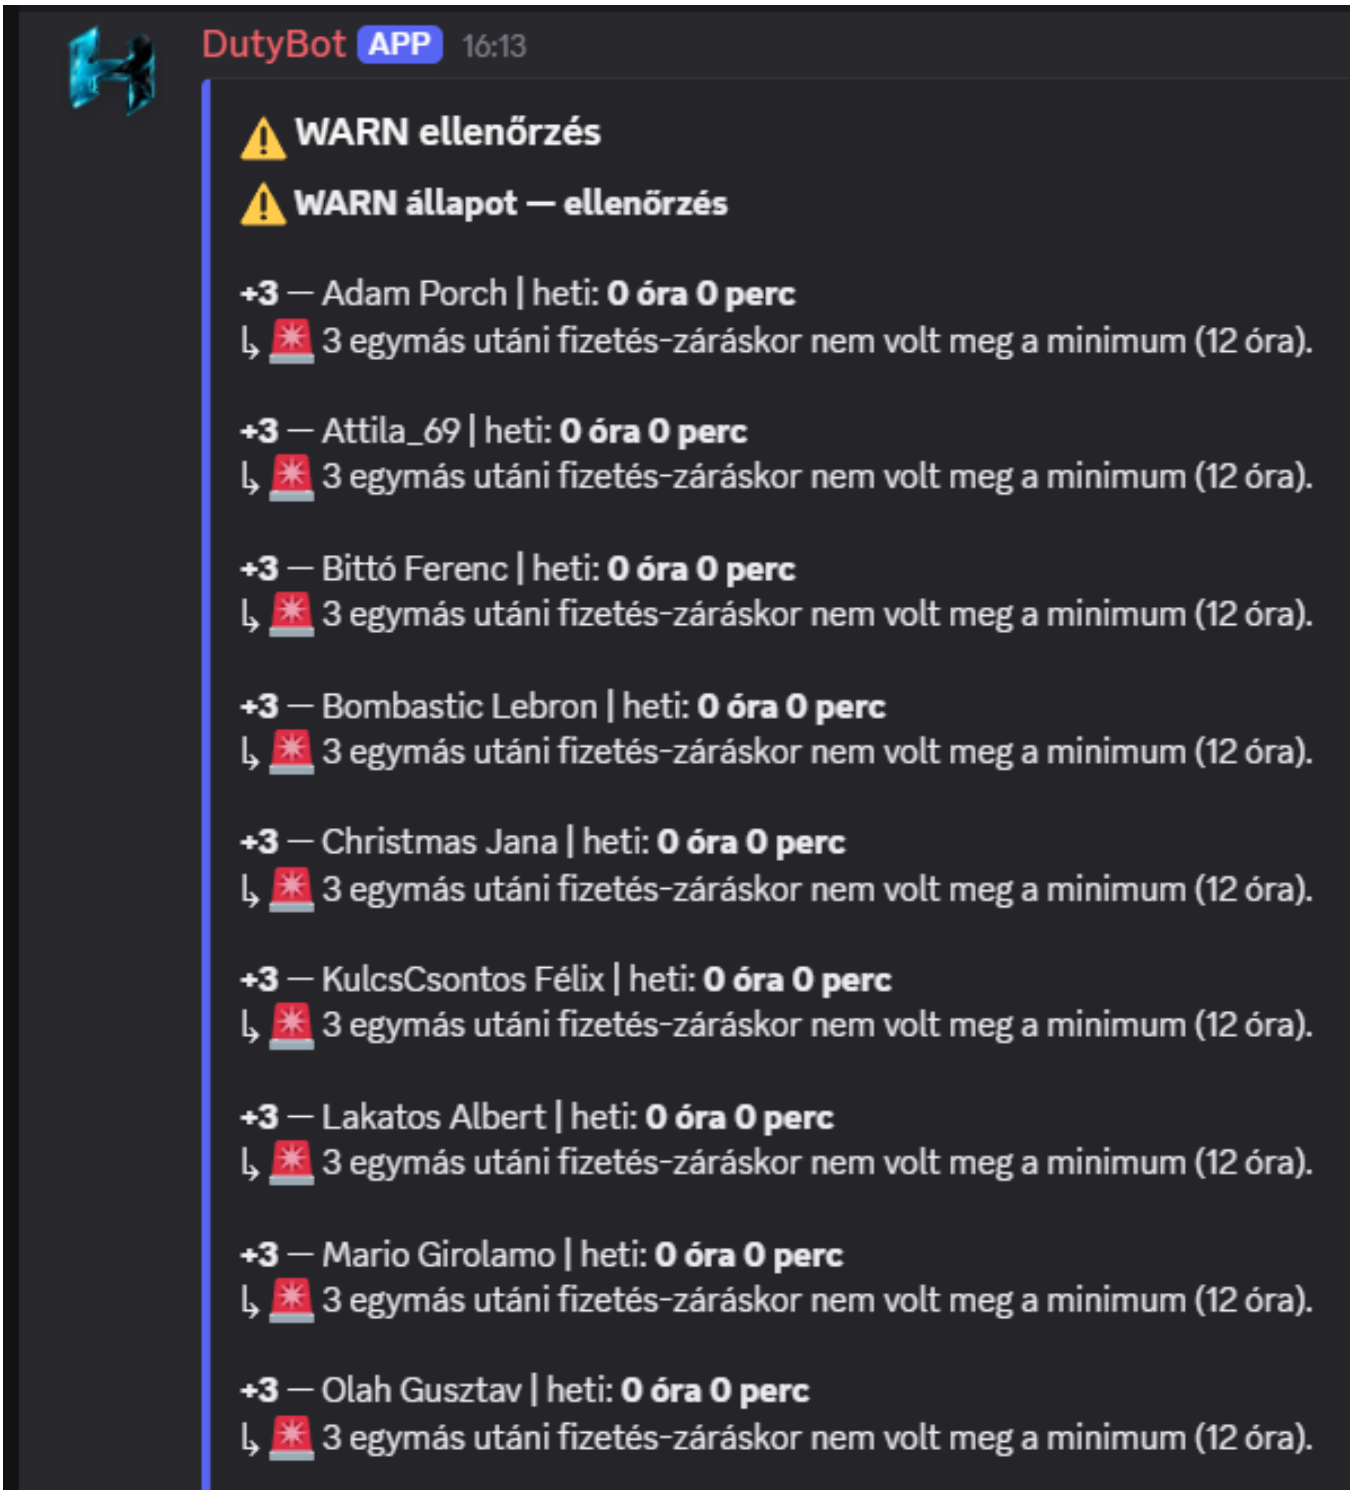

Evidence note: Screenshots are supplied by the bot operator and show actual Discord messages. They demonstrate user-facing features but may not alone establish the technical need for Server Members Intent. Additional technical explanation or a member-event demonstration may be requested.

JokerDuty — Discord Intent Evidence

Exhibit 4: WARN status review

A real bot response lists members, weekly duty totals, and warning status based on the stated 12-hour minimum over three consecutive pay periods.

Evidence note: Screenshots are supplied by the bot operator and show actual Discord messages. They demonstrate user-facing features but may not alone establish the technical need for Server Members Intent. Additional technical explanation or a member-event demonstration may be requested.
